Dealer Catalog

Our Story / Our Process / Our Support / Our Warranty

Custom Autosound Manufacturing, Inc. (CAM) was founded in 1977 by Carl Sprague in his small garage in Fullerton, CA, who recognized the unfulfilled need for a modern AM/FM car radio that would fit into the original dash of his 1963 Corvette. Upon the creation of his prototype our business began.

During the next 10 years, CAM expanded exponentially as we developed products for more vintage cars and model years, such as the 1955-1957 Chevy and 1964-1973 Mustang. This included developing a two-speaker system to replace the single mono dash speaker equipped in most classic cars.

The 1980's and 1990's brought considerable growth for CAM as we proceeded to design and manufacture our own brand of custom-fit radios and speakers while continuing to pioneer modern features including remote CD players and stealth SecretAudio systems to today's Bluetooth technology. CAM offers over 400 different classic car, truck and street rod radio applications and a multitude of upgraded custom-fit speakers, kickpanel speakers and other accessories to meet your needs.

While many competitors and imitators have followed in our footsteps, there is only one CAM where you will find everything you need in one box, with nothing to assemble or need to modify your dash.

CAM is a regular exhibitor at SEMA and many national and international industry shows. CAM is licensed by Ford and GM to use their trademarks and logos in partnership excellence.

We have been building quality radios since 1977 and are a family-operated business with some team members having over 35 years of experience in the industry and with the company.

Our basic head units are manufactured using the same technology standards, and often in the same facilities, as many household name brand audio electronics. Every one of our radios is put through both vibration and temperature testing. We test our radios to ensure they operate at extremely low and high temperatures, along with severe vibration. Each radio is then inspected and hand-adjusted by our on-site technicians. These professionals make sure every radio will fit perfectly in your year, make and model vehicle without any dash modifications or need for extra parts. Lastly, before shipping each radio is given a final hands-on test to insure all features and electronics are working perfectly.

We know that our customers value a ready-to-install radio without having to make modifications to their vintage dash or make special assemblies. Whether your car's radio is a common one or custom one, our team of technicians and special order representatives can assist you before, during or after your purchase. And they are only a phone call away.

With over forty decades of experience, we have seen just about every make and model of car and can help you get the best fit.

We are very proud of our products and confident in their performance as we have a long history of making quality radios. However, in the event it is ever needed, we offer a generous limited warranty of Two (2) years on parts and One (1) year on labor. And our skilled technicians are ready and able to make sure your radio is operating as intended.

Dealer Accessories

Tri-Fold Brochures

Tri-fold brochures are available for several car manufacturers, Counter displays are also available to authorized dealers at no cost. Just add them to your next order.

Mini Catalog

Mini catalog is a six page folder showing a sample of Custom Autosound products. Great for car shows.

Slide the Bar to Change the Display from Classic AM to Full Digital

1967-'73 Mustang

1967-'72 Chevy / GMC Truck

1968-'76 Corvette

Secretaudio® SST-V

Stealth Sound Technology

The SST-V is a 200 Watt AM/FM CD controller with USB MP3/WMA Flash Drive, iPod control, CD control and Satellite ready via AUX or Bluetooth®; Featuring Bluetooth® remote control, ideal for Street Rods and Classics. The SST hideaway radio is designed to provide a classic car or truck with exceptional audio quality while leaving the dash and/or original radio visible in the dash. The SST receiver / amplifier unit is usually hidden underneath the driver's seat or behind the dashboard and integrates with the vehicle's speaker system; if the speakers are for a mono radio they should be replaced with Custom Autosound DVC speakers or DUAL speakers.

- 200 Watt AM/FM Stealth Audio Solution (50W x 4)
- Bluetooth® music streaming and voice calling from your mobile phone.
- USB MP3/WMA Flash Drive Player
- Alpha Numeric LCD Display. (Shows artist/song titles on iPod/USB/Satellite)
- Direct CD-1 Control (Custom Autosound CD-1 player sold separately)
- 4 Channel 3V RCA Pre-Outs
- Subwoofer Pre-Out
- 4-way Fader
- 5 Selection EQ Curves - Pop/Jazz/Classic/Beat/Rock
- Zero Memory Current Draw (no car battery drain when not in use)

LCD Panel Dimensions - 5"W x 2"H x 3/4"D - With 10' Cable

Bluetooth® Remote Control
Up To 33' Range
No Line Of Sight Required

Bracket Mount

Tuner / Amp
Dimensions:
6 3/4"W x 6 1/2"D x 2"H

USA4-DIN

This model looks like a classic shaft style radio. Fits most '84 and up, foreign and domestic vehicles with DIN opening. Available in Chrome.

- Bluetooth® music streaming and voice calling from your mobile phone.
- CD/WMA/USB/SD/MMC Interface
- Fold down & Full detachable face panel
- CD/MP3 Compatible
- Full Electronic Loading CD/MP3 DECK
- ESP-Electronic Shock protection
- 4 x 40 watts
- RCA pre-out (1 PAIR) for rear amplifier
- Front Panel AUX in Jack
- AM/FM PLL Tuning Radio
- Electronic Audio Control, all functions
- USB Jack On Front Panel
- Jumbo Size Multi Color Display Panel
- ID3-TAG Compatible - Shows Artist/Song Title On the Display

USA4-DIN - Chrome

CD-DVD (Audio Only)

The slim size 1/2 DIN CD/DVD Player can be directly controlled from your USA-630, USA-740, SLIDEBAR or SECRETAUDIO radio. This unit plays CD/CD-R/CD-RW/ DVD audio and WMA/MP3 files. It is small enough to hide under the seat or in the glove box. Anti-shock and vibration-free design. It connects directly to Custom Autosound CD controller radios with a single 8 pin DIN cable.

- Plays CD/CD-R/CD-RW/DVD audio/WMA/MP3
- Small enough to hide under the seat or in glove box
- ESP Electronic Shock Protection
- Repeat/ Program/Random/Intro Function
- Multi-Angle Playback
- Last Position Memory
- 9' Cable for connection to CAM head unit
- Dimensions: 7"wide x 1" high x 6 3/4" deep

Front / Rear Speakers

Use Application Guide To Find Correct Speaker For Your Vehicle.

DVC Speakers

Custom Autosound's dual voice coil (DVC) speakers are designed to give you exceptional sound quality from your classic car or truck's original mono speaker location. These speakers provide up to 70% more cone surface area than conventional dual speakers. This gives you improved bass response and 140 Watt power handling. Both of your radio's stereo channels will connect directly to one of our DVC speakers which are available in 6"x9", 5"x7" and 4"x10" sizes.

Dual Speakers

Custom Autosound's dual dash speakers provide great stereo sound from your classic car or truck's factory mono speaker location. Our 1,000 series is designed to replace OEM speakers generally held in-place by screws. Our 2,000 series replaces OEM speakers held in place by metal brackets. All of our dual dash speakers are pre-wired and designed to easily connect to any Custom Autosound radio. Choose from our own line of dual dash speakers or try our optional Kenwood speaker models.

Speakers

Replacing original speakers with Custom Autosound stereo speakers is the easiest way to improve overall sound quality. Whether they're in the dash, kickpanels, doors or rear deck we have the right size for you. Includes grills, wire and hardware. (no grills on 3 1/2" and 4"x6")

4"x 6" Speakers (Pair)

Custom Autosound's 4"x6" speaker pairs are a good choice. They are most commonly used in applications for 1968 and later Corvettes, but will work with any vehicle that has 4" x 6"s. We also offer Kenwood 2-way 60W 4"x6" speaker pairs.

- 4"x6" Two-way speaker
- 80 watts max
- Shallow mounting depth
- Fits many US and European vehicle applications.

6.5" Speakers

Our 6 1/2" 2-Way 100W speaker pairs add a dash of style to your classic interior along with a boost in sound quality and performance.

Our 6 1/2" speakers are generally used in kickpanels and can be purchased as part of a kit along with the kickpanels for most year, make and model classic cars and trucks. We also offer Pioneer 6 1/2" 2-way 250W Speakers.

6"x 9" Speakers (Pair)

Custom Autosound's 3-way 6"x9" speaker pairs are rated at 200 watts and come with our exclusive flat metal grill with black finish. They can easily be painted to match your interior or left as is. We also offer 6"x9" speakers by the following manufacturers:

- Pioneer 3-Way / 400W
- Kenwood 3-Way / 400W

- Full Chrome Speaker Basket
- 4 ohm
- Sensitivity 93db
- 63mm Ferrite Tweeter & 36mm Neodymium Tweeter
- 16 oz. Magnet, 67Hz - 20 kHz frequency response

Undercover Speakers

The UNDERCOVER speaker enclosures from Custom Autosound are designed and manufactured specifically for under the seat or horizontal wall installations. They could also be used on large parcel shelves wherever they may fit.

Undercover I

The UNDERCOVER I is a compact unit with one 5½ inch woofer and a Piezo tweeter in each wood enclosure; with a 120 watt capacity. Sold in pairs only, each unit measures 3 inches tall, 8½ inches wide and 11 inch deep.

Undercover II

The UNDERCOVER II is an upgrade speaker aluminum enclosure for those who want a little more from their speakers. This is it. The UNDERCOVER II has an 8 inch woofer and two Piezo tweeters in each unit. This unit can be mounted in many of the same places as the UNDERCOVER I. With the UNDERCOVER II's 8 inch woofer you get a much fuller and deeper sound.

These are a great addition to Custom Autosound's series of radios with their 200 watt capacity. Measures 3 inches tall, 11 inches wide, and 12½ inches deep.

System 1

The SYSTEM I solves the age-old question of where to put the speakers in classics, customs and street rods. SYSTEM I allows you to keep the integrity of your vehicle intact yet enjoy quality sound like you have in your new car. Satellite speakers look like AC vents and can be mounted just about anywhere. The woofer can be mounted under the seat or even in the trunk.

Amplified

The flat active aluminum subwoofer enclosure with 3-channel amplifier, two 3" mid-tweeter satellite speakers in die cast metal housing and 8" woofer. Amplifier installation kit included.

Amplifier power: 150 watt subwoofer / 2x50 watt mid / tweeter.

Custom Speaker Systems

BackseatDriver®

Add some bottom end power to your system with a Custom Autosound speaker panel. This panel comes equipped with two Custom Autosound 8" sub woofers and the BOSS 600 watt amp. Panel mounts to the back of the rear seat from the trunk. All cables and wires needed are included for a quick and easy install.

Available for:

'67 - '70 Camaro
'68 - '72 Chevelle
'65 - '69 Mustang
'55 - '57 Chevy
'64 Impala

Universal Soundbar

A great sound solution designed to fit against the rear horizontal panel of your '63 - '82 Corvette or other similar fitting. Just 3" deep with two 4" speakers, two mid range speakers and two tweeters, 200 watt power handling.

T-Bird Panel

SATB69P Rear panel speaker assembly for T-birds years 1955-1957.
Covered with black carpet with two 6" x 9" CAM
200 watt speakers installed. Wiring harness included.

VW Rear Speaker Panel

A panel that fits in the package shelf area of the 1957 - 1977 Volkswagen Bugs. Comes with two Custom Autosound 6" x 9" 200 watt speakers.

Kickpanel Speakers

Use Application Guide To Find Correct Kickpanels For Your Vehicle.

Kickpanels

Kickpanels with speakers were developed by Custom Autosound in the 1980's to enhance the sound quality of your radio by adding custom speaker assemblies to classic cars and trucks. While our kickpanels enhance the interior appearance of your ride, they provide great sound and install with no modifications to your vehicle. We've designed them to custom fit perfectly with the door panels on your classic car or truck. We build our kickpanels with black ABS plastic and can be painted to match the interior of your vehicle. Kickpanels come with built-in CAM 6 $\frac{1}{2}$ " coaxial 2-way speakers, and/or Pioneer speakers.

Kickpanels are available with or without speakers.

EL CAMINO 64-66 w/o Air

GMC TRUCK 67-72 w/Air

MUSTANG 64-66

MS CONVERTIBLE 64-66

NOVA 68-72 w/o Air

SKYLARK 68-72 w/Air

Blukit

Wireless interface for Custom Autosound CD controller radios (USA-630, Secretaudio and Slidebar Radios). This adapter plugs into the CD changer port of your Custom Autosound radio and gives you the ability to do hands free calling from your bluetooth capable phone.

Also listen to music stored on your A2DP enabled bluetooth device. If you have a CD changer or CD-1 single player you can still use it with the adapter plugged in (there is a CD changer port on the control box of the Blukit). The main control box has a 1.5' cord that goes to radio CD port, 6.5' cord to answer button and 3.5' cord from answer button to microphone.

Noise Filter

If after installing a new stereo system you experience unwanted motor whine or engine noise, check all grounds on radio, amp, antenna etc. If you still have noise, our filter may help!

Hideaway Antenna

Electromag Hidden Antenna, designed for optimum AM/FM reception. Excellent solution for Streetrods, Show Cars, Classics or any vehicle where a conventional antenna is not desirable.

- Multiple mounting options
- Requires 12-volt power
- No Drilling or grounding required (radio must be grounded properly)
- 80" Power and Antenna Cable

Automatic Antenna

This full size power antenna is a great addition to any classic car. It will provide a cleaner, more modern look; it is also convenient when using a car cover. The power antenna automatically rises when the radio is turned on and lowers when radio is turned off.

This power antenna will easily mount behind a fender or quarter panel where there is clearance.

ANTUV-F extends 31 inches with 11½ inches clearance needed under fender.

Power Inverter

Will operate 12 volt negative ground accessories from 6, 8 or 12 volt positive ground electrical systems. When used in a 6 volt positive ground system, it can continuously supply more than 2.1 amps with the engine off, and about 2.5 amps with the engine running at a fast idle. In a 12 volt positive ground system it can supply 4.0 amps (min) and 4.7 amps (max) continuous duty. The PGPI-HC uses a common ground so isolation is not necessary, and because of its efficient design, its current draw is negligible when no load is applied (10 milliamps).

NOT RECOMMENDED FOR: Power actuated door locks, trunk release solenoids, air conditioner clutches, fans, blowers, power windows, or other electromechanical devices.

69-70 Radio Support Bracket

Radio Support Bracket for all 1969-1970

Mustangs & Cougars.

Since the radio is held by this bracket and not the dash, this bracket is crucial for mounting any radio in your 1969-1970 Mustang or Cougar.

55-56 Speaker Bracket Chevy

This Chevy replacement dash speaker bracket has been manufactured to meet or exceed factory specifications and performance. You will find the fit and function will work perfectly for your Chevy.

Voltage Booster

Will operate 12 volt negative ground accessories from 6 or 8 volt negative ground electrical systems. The maximum output power is a function of input voltage. When used in a 6 volt system, it can continuously supply more than 3½ amps with the engine off, and about 5 amps with the engine running at a fast idle. Because of its very efficient design, its current draw is negligible when no load is applied (10 milliamps).

NOT RECOMMENDED FOR: Power actuated door locks, trunk release solenoids, air conditioner clutches, fans, blowers, power windows, or other electromechanical devices.
